Soviet Astronomy - AJ

Volume 14, 1970

Page numbers in brackets refer to the Russian edition.

- Abbasov, G. I. Computer Determination of the Wavelengths of Spectral Lines. (E) - 539 [673]
- Abdusamatov, Kh. I. The Structure of the Magnetic Field in a Sunspot with a Photospheric Light-Bridge at Two Levels in the Solar Atmosphere. (E/T) - 64 [82]
- Abramyan, G. L., E. A. Benediktov, G. G. Getmantsev, and V. A. Zinichev. The Existence of a Galactic Radio Corona. (E/T) - 391 [487]
- Akhundova, G. V. and Z. F. Seidov. Spatial Orientation of Planetary Nebulae. (T/E) - 104 [129]
- and Z. F. Seidov. The Apparent Distribution of Planetary Nebulae and Open Star Clusters. (E) - 734 [911]
- Aleshin, V. I. and S. A. Kaplan. Evolution of a Protostar Cluster in the Standard 25-Body Problem. (T) - 6 [10]
- and O. B. Shchuko. Thermal Conditions in the South Pole of Mars. - 315 [392]
- Ariskin, V. I. Background Radio Emission in the Galactic Longitude Interval $l^{\text{II}} = 20.8-32.8^{\circ}$. (E) - 396 [493]
- Artiyukhina, N. M. The Structure of the Cluster M39. (E) - 130 [162]
- The Z Motions of Groups of Early-Type Stars and Orion Variables. (E) - 533 [667]
- Avramchuk, V. V. Spectrophotometry of the λ 6190 Methane and λ 6441 and 6478 Ammonia Absorption Bands on the Disk of Jupiter. (T/E) - 462 [577]
- Barabashov, N. P. Reasons for the Difference in the Brightness Distribution over the Lunar and Martian Disks at Phases Close to Zero. (T) - 868 [1083]
- Bazelyan, L. L., S. Ya. Braude, and A. V. Men'. Scattering of the Decimeter Radio Emission of the Crab Nebula by the Solar Corona. (E/T) - 153 [188]
- Beigman, I. L. and L. A. Vainshtein. Thermal Model of Solar Corona Active Regions. (E/T) - 825 [1030]
- Bel'skii, S. A. The Magnetic Fields of Meteor Streams as a Possible Mechanism for the Diffusion of Cosmic Rays in Circumsolar Space. (E/T) - 163 [201]
- Benediktov, E. A. (See Abramyan, G. L.) - 391 [487]
- Berulis, I. I. (See Sorochenko, R. L.) - 683 [856]
- Bisnovatyi-Kogan, G. S. and Z. F. Seidov. Nonequilibrium β Processes as a Source of Thermal Energy of White Dwarf Stars. (T) - 113 [139]
- and R. A. Syunyaev. The Evolution of Massive Stars and Strömberg Zones. (T) - 351 [441]
- The Explosion of a Rotating Star as a Supernova Mechanism. (T) - 652 [813]
- and Ya. B. Zel'dovich. Growth of Perturbations in an Expanding Universe of Free Particles. (T) - 758 [942]
- Blinov, N. S. (See Fedoseev, E. N.) - 537 [671]
- Borsov, G. G. The Z Distribution of Early-Type Stars. (E) - 988 [1237]
- Braude, S. Ya. (See Bazelyan, L. L.) - 153 [188]
- Brazhnikova, E. P. Selection Effects in the Discovery of Spectroscopic Binary Stars and the Interpretation of the B Effect. (T/E) - 120 [149]
- and V. V. Radzievskii. The Zero-Moment Surface in the Problem of Two Fixed Centers. (T/E) - 119 [650]
- (See Radzievskii, V. V.) - 171 [211]
- Broderick, J. J., V. V. Vitkevich, D. L. Jauncey, V. A. Efanov, K. I. Kellermann, B. G. Clark, L. R. Kogan, V. I. Kostenko, M. H. Cohen, L. I. Matveenko, I. G. Moiseev, J. Payne, and B. Hansson. Observations of Compact Radio Sources with a Radio Interferometer Having a Green Bank-Crimea Baseline. (E) - 627 [784]
- Brodskaya, E. S. A Photoelectric Study of the Magnetic Star β Coronae Borealis. (E) - 529 [662]
- Charugin, V. M. The Inverse Compton Effect for Power-Law Radiation Scattered by Relativistic Electrons with a Power-Law Spectrum. (T) - 531 [664]
- Chechetkin, V. M. (See Imshennik, V. S.) - 747 [929]
- Chernikov, Yu. A. The Photogravitational Restricted Three-Body Problem. (T) - 176 [217]
- Chernov, G. P. (See Markeev, A. K.) - 835 [1044]
- Chertok, I. M. (See Fomichev, V. V.) - 185 [226]

ABSTRACTS

Radioastronomy: Abstracts of Papers on Astrophysics Published in the Journal Radiofizika. (R) - 370 [458]

Radioastronomy: Abstracts of Papers on Astrophysics Published in the Journal Radiofizika. (R) V. A. Efanov, A. G. Kislyakov, V. I. Kostenko, L. I. Matveenko, I. G. Moiseev, and A. I. Naumov - 744 [922]

ANNOUNCEMENTS

Annals of the IGSY. (R) - 190 [230]

ARTIFICIAL SATELLITES

A Method for Determining the Mass Ratio of the Earth and Moon. (T) L. G. Luk'yanov - 719 [894]

Perturbations in Satellite Orbital Elements from the Tesserad and Sectorial Harmonics of the Earth's Potential. (T) A. N. Yashkin - 890 [1112]

Spectrophotometry of Nova Herculis 1963. IV. Observations in 1966-1967. (E/T) V. T. Doroshenko, É. A. Dibai, and V. F. Esipov - 921 [1153]

ASSOCIATIONS, STELLAR

Cold Regions of Interstellar Gas and the Formation of Stellar Associations. (T) S. B. Pikel'ner - 208 [254]

ASTERIODS

A Method for Developing an Analytic Trigonometric Theory for the Motion of Resonance Asteroids. (T) E. A. Grebenkov - 344 [431]

BOOK REVIEWS

Some Determinations at Pulkovo of Absolute Stellar Proper Motions Relative to Galaxies. (E/T) N. V. Fatchikhin - 495 [619]

Some Results of Clock-Correction Determinations by the Method of Star Pairs Symmetric about the Zenith. (E/T) V. N. Pyshtenkov - 505 [633]

K. A. Kulikov, A. Course in Spherical Astronomy. (R) Reviewed by É. A. Mogilevskii - 917 [1148]

The Kreinin-Murri Method for Absolute Determination of Equatorial-Star Declinations. (T) M. S. Zverev - 1038 [1300]

The Influence of Refraction Anomalies on Latitude Observations at Irkutsk and Blagoveshchensk. (E/T) V. I. Sergienko - 1060 [1328]

ASTRONOMY, HISTORY AND PROGRESS

Journal for the History of Astronomy. (R) Reviewed by P. G. Kulikovskii - 742 [920]

BINARIES, ECLIPSING

Close Binary Stars in Globular and Old Open Clusters. (E) B. V. Kukarkin and A. V. Mironov - 967 [1211]

Galaxies, Structure
Galaxies, Rotation and Mass
Galaxies, Peculiar and Seyfert
Galaxies, Interacting
Galaxies, Clusters
Quasistellar Objects, Physical Theory
Intergalactic Medium
Primordial Background Radiation

Each paper is designated as follows:

(E) Experimental
(T) Theoretical
(E/T) Experimental supported by theory
(T/E) Theoretical supported by experiment
(R) Review, Report, Announcement

BINARIES, SPECTROSCOPIC

Selection Effects in the Discovery of Spectroscopic Binary Stars and the Interpretation of the B Effect. (T/E) É. F. Brazhnikova - 120 [149]

X-Ray Sources in Binary Systems. (T) O. Kh. Guseinov - 912 [1143]

ASTROMETRY

CELESTIAL MECHANICS

The Bipolar Moments Integral in Certain Problems of Celestial Mechanics. (T) V. V. Radzievskii and É. F. Brazhnikova - 171 [211]

The Photogravitational Restricted Three-Body Problem. (T) Yu. A. Chernikov - 176 [217]

The Translational-Rotational Motion of the Moon in the Earth's Gravitational Field. (T) G. F. Osipov - 336 [440]

The Zero-Moment Surface in the Problem of Two Fixed Centers. (T/E) É. F. Brazhnikova and V. V. Radzievskii - 519 [650]

The Existence of an Integral of the Equations of Translational-Rotational Satellite Motion in the Circular Three-Body Problem. (T) G. F. Osipov - 541 [676]

Libration Points in the Generalized Restricted Three-Body Problem. (T) G. N. Duboshin - 882 [1100]

CEPHEIDS

The Nonequilibrium Character of the Continuous Emission of Classical Cepheids at Maximum Light. (E/T) N. N. Yakimova - 241 [297]

The Phase Shift between the Radius and Temperature Variations in Cepheids. (E/T) I. G. Kolesnik - 729 [906]

Normal Color Indices of Cepheids. III. (T/E) N. S. Nikolov and G. R. Ivanov - 806 [1004]

The Normal Color Indices and Color Excesses of Long-Period Cepheids. (T/E) E. N. Makarenko - 970 [1215]

CHARGED PARTICLES, ACCELERATION AND EMISSION
Spectrum of Relativistic Particles Accelerated by Plasma Turbulence. (T/E) V. N. Tsytovich and A. S. Chikhachev - 385 [479]

CHROMOSPHERE

The Energy Balance in Spicules. (T) Nguyen Ngan - 72 [91]
Profile of the 10,830-Å Line on the Solar Disk. (E/T) Nguyen Ngan - 283 [351]

CLUSTERS, GLOBULAR

Close Binary Stars in Globular and Old Open Clusters. (E) B. V. Kukarkin and A. V. Mironov - 967 [1211]
Theoretical Expressions for the Density in a Slit Aperture. (T) Ü.-I. K. Veltmann - 1027 [1286]

CLUSTERS, OPEN

The Structure of the Cluster M39. (E) N. M. Artyukhina - 130 [162]
A Method for Determining the Selective Absorption and Distance to an Open Cluster from Its Color-Magnitude Diagram, with Allowance for the Evolutionary Departures of Its Stars from the Zero-Age Main Sequence. (E/T) T. A. Uranova - 448 [560]
The Apparent Distribution of Planetary Nebulae and Open Star Clusters. (E) G. V. Akhundova and Z. F. Seidov - 734 [911]

COMETS, MOTIONS

Origin of the Nearly Parabolic Comets. (E) V. V. Radzievskii and V. P. Tomanov - 877 [1094]

COMETS, PHYSICAL PROPERTIES

The Fifth Soviet National Conference on Cometary Physics, Kiev, October 6-9, 1969. (R) G. A. Rubo and K. I. Churyumov - 366 [454]
W. Högnér and N. Richter. Isophotometrischer Atlas Der Kometen. Teil I. Erläuterungen und Tabellen. (R) Reviewed by A. A. Mikhailov - 545 [690]
Physical Processes in Comet Heads. (T/E) Yu. N. Gnedin, A. Z. Dolginov, and G. G. Novikov - 700 [870]

CONFERENCES AND MEETINGS

The Sixth Symposium on Cosmical Gas Dynamics, International Astronomical Union and International Union of Theoretical and Applied Mechanics, Crimea, September 6-19, 1969. (R) S. B. Pikel'ner - 187 [228]
The Fifth Soviet National Conference on Cometary Physics, Kiev, October 6-9, 1969. (R) G. A. Rubo and K. I. Churyumov - 366 [454]
Plenary Meeting of the Commission on the Study of the Earth's Rotation, Astronomical Council, Academy of Sciences of the USSR. (R) Ya. S. Yatskiy - 548 [683]

CONVECTION IN SUN AND STARS

The Properties of Low-Frequency Oscillatory Convection in a Strong Magnetic Field. (T) Yu. D. Zhugzhda - 274 [340]

CORONA AND SUPERCORONA

Scattering of the Decimeter Radio Emission of the Crab Nebula by the Solar Corona. (E/T) L. L. Bazelyan, S. Ya. Braude, and A. V. Men' - 153 [188]
Quiet Corona Temperature Determined from the Soft X-Radiation Flux. (E/T) I. A. Zhilnik, V. V. Krutov, and M. A. Livshits - 563 [702]
Possible Role of the Maser Effect in the Radar Echo from the Sun. (T) I. M. Gordon and V. N. Tsytovich - 567 [708]
Thermal Model of Solar Corona Active Regions. (E/T) I. L. Belgman and L. A. Vainshtein - 825 [1030]
Inner Corona Polarization during the Solar Eclipse of September 22, 1968. (E/T) G. M. Nikol'skii and A. A. Sazanov - 831 [1038]

Thomson Scattering as a Cooling Mechanism for the Solar Corona. (T/E) A. F. Ilarionov and R. A. Syunyaev - 910 [1141]

COSMIC RAYS

Cosmic-Ray Electrons in the Galaxy. (T/E) V. A. Razin - 44 [56]
Influence of Ionization Losses on the Spectrum and Chemical Composition of Cosmic Rays in the Nonrelativistic Energy Range. (T/E) V. N. Sazonov - 676 [841]

COSMOGONY AND COSMOLOGY

Fundamental Equations for Cosmological Models Which Include Matter and Radiation. (T) A. Sapar - 403 [503]
Dynamical Parameters of Galaxies as a Consequence of Cosmological Turbulence. (T/E) L. M. Ozernoi and G. V. Chibrikov - 615 [769]
Growth of Perturbations in an Expanding Universe of Free Particles. (T) G. S. Bisanovskiy-Kogan and Ya. B. Zel'dovich - 758 [942]
Mixmaster Universes and the Cosmological Problem. (T) A. G. Doroshkevich and I. D. Novikov - 763 [948]
The Origin of Mass Motion in Homogeneous Anisotropic Cosmological Models and the Chemical Composition of Primordial Matter. (T) I. D. Novikov - 960 [1203]
Gravitational Stability of an Expanding Universe in the Presence of a Magnetic Field. (T) T. V. Ruzmalkina and A. A. Ruzmalkin - 963 [1206]

CRAB NEBULA

Scattering of the Decimeter Radio Emission of the Crab Nebula by the Solar Corona. (E/T) L. L. Bazelyan, S. Ya. Braude, and A. V. Men' - 153 [188]
Relation between the Pulsar NP 0532 and the Small-Angular-Size Radio Source in the Crab Nebula. (E/T) L. I. Matveenko and N. A. Lotova - 388 [483]

DISCRETE RADIO SOURCES

Observations of Compact Radio Sources with a Radio Interferometer Having a Green Bank-Crimea Baseline. (E) J. J. Broderick, V. V. Vitkevich, D. L. Jauncey, V. A. Efanov, K. I. Kellermann, B. G. Clark, L. R. Kogan, V. I. Kostenko, M. H. Cohen, L. I. Matveenko, I. G. Moiseev, J. Payne, and B. Hanason - 627 [784]
Extragalactic Radio Sources. I. Radio Spectra: Statistics, Interpretation, Classification. (E/T) V. N. Kuril'chik - 630 [787]
Extragalactic Sources of Cosmic Radio Waves. II. The Relation of the Radio Spectra to the Apparent Structure of the Radio Sources and the Character of the Optical Objects. (E) V. N. Kuril'chik - 924 [1157]

DOUBLE AND MULTIPLE STARS

Measurements of Capella with the Pulkovo Stellar Interferometer. (E) E. S. Kulagin - 445 [557]
The Zero-Moment Surface in the Problem of Two Fixed Centers. (T/E) É. F. Brazhnikova and V. V. Radzievskii - 519 [650]

DYNAMICS AND KINEMATICS OF STELLAR SYSTEMS

Numerical Calculation of the Evolution of a Spherical Galaxy with Rotation. (T) B. M. Dryuba and V. B. Yakubov - 1 [3]
Evolution of a Protostar Cluster in the Standard 25-Body Problem. (T) V. I. Alekhin and S. A. Kaplan - 6 [10]
Supermassive Stars Formed by Inelastic Evolution of Stellar Systems. (T) L. É. Ourevich - 25 [32]
Thermodynamic Irreversibility and Relaxation in Galaxies. (T) L. S. Marochnik - 36 [46]
On a Study by Podurets of the Stability of Relativistic Star Clusters. (T) James R. Ipser - 364 [452]
The Character of the Peculiar-Velocity Distribution of Differentially Rotating Stellar Systems. (T) M. N. Maksimov - 535 [668]
Velocity Distribution of Stars of Equal Mass in Clusters. (T) V. S. Kaliberda - 773 [960]
Correlation of Fluctuations in Gravitating Media. (T) I. L. Genkin - 778 [967]

EARTH, ATMOSPHERE

- The Application of Lunar Eclipses for Surveying the Optical Properties of the Atmosphere. (T) V. G. Fesenkov - 195 [237]
 F. Link and L. Neußl. Tables of Light Trajectories in the Terrestrial Atmosphere. (R) Reviewed by G. B. Sholomitskii - 544 [679]

EARTH, FIGURE

- Perturbations in Satellite Orbital Elements from the Tesserad and Sectorial Harmonics of the Earth's Potential. (T) A. N. Yashkin - 890 [1112]
 The Convergence of the Expansion for the Zonal Harmonics in the Geopotential. (T) M. S. Petrovskaya - 901 [1128]

EARTH, ROTATION

- Plenary Meeting of the Commission on the Study of the Earth's Rotation, Astronomical Council, Academy of Sciences of the USSR. (R) Ya. S. Yatskiv - 548 [683]
 A Spectral Analysis of the Pulsations in the Earth's Rotational Velocity. (E/T) A. A. Korsun' and N. S. Sidorenkov - 896 [1121]
 A Correlation Analysis of the Earth Tides and Nutation. (E/T) G. P. Pil'nik - 1044 [1308]

EARTH, SURFACE PROPERTIES

- An Aerial Survey of Volcanic Rock Surfaces in Kamchatka. (E) Yu. N. Lipakii, G. S. Shteinberg, M. M. Pospergelis, and V. V. Novikov - 329 [411]
 Possible Continental Drifts in 1960. (E/T) N. N. Pavlov - 725 [902]
 The Secular Motion of the Earth's Poles. (E/T) A. A. Mikhailov - 1035 [1296]

ECLIPSES, LUNAR

- The Application of Lunar Eclipses for Surveying the Optical Properties of the Atmosphere. (T) V. G. Fesenkov - 195 [237]

 Nonlinear Stellar Density Waves and the Spiral Structure of Galaxies. (T) N. G. Pititsyna - 400 [499]
 Shock Waves in the Spiral Arms of Sc Galaxies. (T/E) S. B. Pikel'ner - 602 [752]

GALAXY (MILKY WAY), RADIO EMISSION

- The Existence of a Galactic Radio Corona. (E/T) G. L. Abramyan, E. A. Benediktov, G. G. Getmantsev, and V. A. Zinichev - 391 [487]
 Background Radio Emission in the Galactic Longitude Interval $l^{\text{II}} = 20.8-32.8^\circ$. (E) V. I. Ariskin - 396 [493]

GALAXY, STRUCTURE

- The Structure of the Absorbing Material in the Solar Neighborhood. (E) G. A. Starikova - 694 [863]
 The Structure of the Galaxy and the Visible Picture of the Milky Way. (T) E. D. Pavlovskaya and A. S. Sharov - 849 [1058]
 The Brightness of the Milky Way, Absorption of Light, and the Problem of Localizing the Spiral Arms of the Galaxy. (T/E) A. S. Sharov - 942 [1180]

GRAVITATIONAL INSTABILITY

- Jeans Instability in Multicomponent Systems. (E) A. A. Suchkov - 947 [1187]
 The Motion of Flat-Subsystem Stars in a Gravitational Field Subject to Unstable Spiral Perturbations. (T) S. G. Pomagaev - 952 [1193]

Gravitational Stability of an Expanding Universe in the Presence of a Magnetic Field. (T) T. V. Ruzmaikina and A. A. Ruzmaikina - 963 [1206]

GRAVITY AND GRAVIMETRY

The Convergence of the Expansion for the Zonal Harmonics in the Geopotential. (T) M. S. Petrovskaya - 901 [1128]

INFRARED PHOTOMETRY

Profile of the 10,830-Å Line on the Solar Disk. (E/T) Nguyen Ngan - 283 [351]

λ10,830 Line in Solar Active Regions. (E) Nguyen Ngan - 577 [720]

INTERFEROMETRY

Interferometric Observation of the Thin-Filamentary Nebula NGC 6888. (E) T. A. Lozinskaya - 98 [122]

Measurements of Capella with the Pulkovo Stellar Interferometer. (E) E. S. Kulagin - 445 [557]

The Influence of Atmospheric Turbulence on Stellar Interferometry. (T) W. I. Weitzel - 716 [890]

INTERGALACTIC MEDIUM

Quasar-Like Phenomena and Accumulation of Intergalactic Gas by Galaxies. (T) L. M. Ozernoi - 217 [265]

The Ionization and Heating of Intergalactic Gas. (T) O. F. Prihutekii and I. L. Rozental' - 770 [957]

INTERPLANETARY MEDIUM

The Central Part of the Coma Cluster of Galaxies. (E) V. I. Gorbachev - 182 [224]

Static Solar H II Zone. (T) K. V. Krasnobayev - 840 [1047]

INTERSTELLAR MEDIUM

The Sixth Symposium on Cosmical Gas Dynamics. International Astronomical Union and International Union of Theoretical and Applied Mechanics, Crimea, September 6-19, 1969. (R) S. B. Pikel'ner - 187 [228]

Cold Regions of Interstellar Gas and the Formation of Stellar Associations. (T) S. B. Pikel'ner - 208 [254]

Influence of Ionization Losses on the Spectrum and Chemical Composition of Cosmic Rays in the Nonrelativistic Energy Range. (T/E) V. N. Sazonov - 676 [841]

The Structure of the Absorbing Material in the Solar Neighborhood. (E) G. A. Starikova - 694 [863]

Observations of Comet-Shaped Nebulae and Globules. (E) É. A. Dibai - 785 [977]

Emission of a Homogeneous Sphere in an Isotropic Radiation Field. (T) A. V. Kurchakov - 1069 [1339]

INTERSTELLAR MEDIUM, INTERACTION WITH STARS

Stellar Radiation Pressure upon Spherical Interstellar Dust Particles. (T) N. B. Divari and L. V. Reznova - 133 [166]

The Evolution of Massive Stars and Strömgren Zones. (T) G. S. Bionovaty-Kogan and R. A. Syunyaev - 351 [441]

The Influence of Stellar Wind on Accretion. (T) V. F. Shvartsman - 527 [660]

Ionization Zones around Neutron Stars: H α Emission, Heating of the Interstellar Medium, and the Influence on Accretion. (T/E) V. G. Shvartsman - 662 [824]

IONIZATION AND EXCITATION

Static Solar H II Zone. (T) K. V. Krasnobayev - 840 [1047]

JUPITER

Spectrophotometry of the λ 6190 Methane and λλ 6441 and 6478 Ammonia Absorption Bands on the Disk of Jupiter. (T/E) V. V. Avramchuk - 462 [577]

LATITUDE AND LONGITUDE

On the Chandler Motion of the Pole. (E) V. V. Nesterov and L. V. Rykhlova - 340 [426]

Reduction of Astronomical Latitude, Longitude, and Azimuth Determinations to a Common Epoch. (T/E) A. A. Mikhailov - 490 [513]

The Possibilities of Determining Variations in Longitude Differences from Radio Observations. (T) E. N. Fedoseev and N. S. Blinov - 537 [671]

Possible Continental Drifts in 1960. (E/T) N. N. Pavlov - 725 [902]

Two Models for the Chandler Motion of the Pole. (T/E) L. V. Rykhlova - 739 [916]

The Secular Motion of the Earth's Poles. (E/T) A. A. Mikhailov - 1035 [1296]

Amplitude Variations in the Free Diurnal Nutation of the Earth. (E) N. A. Popov and Ya. S. Yatskevich - 1057 [1324]

The Influence of Refraction Anomalies on Latitude Observations at Irkutsk and Blagoveshchensk. (E/T) V. I. Sergienko - 1060 [1328]

MARS

Halo Phenomena in the Martian Atmosphere on Ice and Unknown Crystals. (E/T) V. D. Davydov - 139 [172]

The Possibility of Investigating Properties of Martian Soil through Its Radio Emission. (T/E) V. S. Troitskii - 308 [384]

Thermal Conditions in the Region of the South Pole of Mars. (E) V. I. Alekshin and O. B. Shchukov - 315 [392]

The Opposition Effect of Mars and Some Possible Properties of the Crystal Structure in the Martian Atmosphere. (T/E) V. D. Davydov - 355 [446]

Statistical Analysis of the Phase Dependence of the Total Martian Brightness. (E/T) A. V. Morozhenko, A. A. Rubashevskii, and É. G. Yanovitskii - 861 [1073]

Reasons for the Difference in the Brightness Distribution over the Lunar and Martian Discs at Phases Close to Zero. (T) N. P. Barabashov - 868 [1083]

METEOR STREAMS

The Magnetic Fields of Meteor Streams as a Possible Mechanism for the Diffusion of Cosmic Rays in Circumsolar Space. (E/T) S. A. Bel'skii - 163 [201]

MOON

Zdeněk Kopal. The Moon. Reviewed by V. V. Shevchenko - 914 [1146]

The Moon. An International Journal of Lunar Studies. Reviewed by V. V. Shevchenko - 1071 [1341]

MOON, GRAVITATIONAL FIELD

A Method for Determining the Mass Ratio of the Earth and Moon. (T) L. G. Luk'yanov - 719 [894]

MOON, MOTION

The Translation-Rotational Motion of the Moon in the Earth's Gravitational Field. (T) G. F. Ostrov - 336 [420]

MOON, RADIO EMISSION

Measurements of Lunar Radio Emission at 1.42 mm. (E/T) L. I. Fedoseev and Yu. Yu. Kulikov - 737 [914]

MOON, SURFACE PROPERTIES

A Red Spot Observed within the Lunar Crater Aristarchus on April 1, 1969. (E) N. A. Kosyrev - 145 [179]

An Aerial Survey of Volcanic Rock Surfaces in Kamchatka. (E) Yu. N. Lipetskii, G. S. Shteinberg, M. M. Posperskii, and V. V. Novikov - 329 [411]

Principles of the Physical Mapping of the Lunar Surface. (E/T) Yu. N. Lipetskii and V. V. Shevchenko - 469 [586]

Physical Mapping of the Moon from Photometric Data. (E/T) V. V. Shevchenko - 478 [599]

The Structure of the Top Reflecting Layer of the Lunar Surface. (E/T) Yu. G. Matveev - 712 [885]

Reasons for the Difference in the Brightness Distribution over the Lunar and Martian Discs at Phases Close to Zero. (T) N. P. Barabashev - 868 [1083]

MOON AND PLANETS, OBSERVATIONS FROM

The Atmospheric Pressure on the Moon According to the Surveyor 7 Twilight Photography. (E) G. V. Rozenberg - 361 [449]
Determination of the Rotation Vector of a Planet. (T) Ya. L. Ziman, B. V. Nepoklonov, and B. N. Rodionov - 1019 [1277]

NEBULAE, DIFFUSE

Interferometric Observation of the Thin-Filamentary Nebula NGC 6888. (E) T. A. Lozinskaya - 98 [122]
Physical Conditions in the Orion Nebula from Observations of the H56 α Excited-Hydrogen Radio Line. (E/T) R. L. Sorochenko and I. I. Benuks - 683 [850]
Observations of Comet-Shaped Nebulae and Globules. (E) É. A. Dibai - 785 [977]

NEBULAE, PLANETARY

Spatial Orientation of Planetary Nebulae. (T/E) G. V. Akhundova and Z. F. Seidov - 104 [129]
The Apparent Distribution of Planetary Nebulae and Open Star Clusters. (E) G. V. Akhundova and Z. F. Seidov - 734 [911]
Investigation of Planetary Nebulae in the Near Ultraviolet Region of the Spectrum. (E) E. B. Kostyakova - 794 [899]

NEUTRINO RADIATION

Thermodynamics under Conditions of Hot Matter Neutronization and the Hydrodynamic Stability of Stars at Late Stages of Evolution. (T) V. S. Inshennik and V. M. Chechetkin - 747 [929]

NOVAE

Spectrophotometry of Nova Herculis 1963, IV. Observations in 1966-1967. (E) V. T. Doroshenko, É. A. Dibai, and V. F. Esipov - 921 [1153]

ORBITS, THEORY AND COMPUTATION

A Method for Developing an Analytic Trigonometric Theory for the Motion of Resonance Asteroids. (T) E. A. Grebenikov - 344 [431]
Perturbations in Satellite Orbital Elements from the Tesseral and Sectorial Harmonics of the Earth's Potential. (T) A. N. Yashkin - 890 [1112]
Cases of Resonance in Satellite Orbital Elements. (T) S. N. Yashkin - 1030 [1289]

PERSONALIA AND OBITUARIES

Hundredth Anniversary of the Birth of Vladimir Il'ich Lenin - 193 [235]

PHOTOGRAPHIC TECHNIQUES

Some Procedural Matters in Astronomical Photography. (T/E) A. B. Palei - 167 [206]

PHOTOMETRY

An Aerial Survey of Volcanic Rock Surfaces in Kamchatka. (E) Yu. N. Lipskii, G. S. Shteinberg, M. M. Posperegis, and V. V. Novikov - 329 [411]
A Method for Determining the Selective Absorption and Distance to an Open Cluster from Its Color-Magnitude Diagram, with Allowance for the Evolutionary Departures of Its Stars from the Zero-Age Main Sequences. (E/T) T. A. Uranova - 448 [560]
The Influence of, and Allowance for, the Background in Photographic Photometry. (T/E) V. N. Sinicheskii and B. F. Sinicheskii - 855 [1066]
Theoretical Expressions for the Density in a Slit Aperture. (T) Ü.-I. K. Veltmann - 1027 [1286]

PLANETS AND SATELLITES

Diffuse Reflection and Transmission of Light by a Planetary Atmosphere with a Three-Term Scattering Law. (T) A. K. Kolesov and O. I. Smoktiti - 319 [397]
The Figure of Planets with a Uniform or Two-Component Density Distribution. (T/E) V. N. Zharkov and V. P. Trubitsyn - 1012 [1268]
Determination of the Rotation Vector of a Planet. (T) Ya. L. Ziman, B. V. Nepoklonov, and B. N. Rodionov - 1019 [1277]

PLASMA PROCESSES

Contribution to the Theory of Type III Solar Radio Bursts. I. (T) V. V. Zheleznyakov and V. V. Zaitsev - 47 [60]
The Theory of Type III Solar Radio Bursts. II. (T/E) V. V. Zheleznyakov and V. V. Zaitsev - 250 [308]
Possible Role of the Maser Effect in the Radar Echo from the Sun. (T) I. M. Gordon and V. N. Tsytovich - 567 [708]

POLARIZATION AND POLARIMETRY

Some Procedural Matters in Astronomical Photography. (T/E) A. B. Palei - 167 [206]
The Polarization of Solar Radio Emission Observed after Reflection at Meter Wavelengths. (T/E) V. V. Fomichev and I. M. Chertok - 261 [322]
Observations of Sunspot Magnetic Fields: Two New Effects. (E) V. F. Chistyakov - 426 [533]
Polarization of Local Sources of Solar Radio Emission at 4.4 cm. (E/T) G. B. Gel'treich and N. G. Peterova - 553 [689]
Inner Corona Polarization during the Solar Eclipse of September 22, 1968. (E/T) G. M. Niko'skii and A. A. Sazanov - 831 [1038]

PRIMORDIAL BACKGROUND RADIATION

The Background Radiations. (T/E) O. F. Prilutskii, I. L. Rozental', and I. B. Shukalov - 669 [832]
An Attempt to Detect Protogalaxies from Fluctuations in the Primordial Background Brightness. (E/T) Yu. N. Parilskii and T. B. Pyatunina - 1067 [1337]

PULSARS

Pulsars and Nonthermal Radio Sources. (T) N. S. Kardashev - 375 [465]
Relation between the Pulsar NP 0532 and the Small-Angular-Size Radio Source in the Crab Nebula. (E/T) L. I. Matveenko and N. A. Lotova - 388 [483]

QUASISTELLAR OBJECTS, PHYSICAL THEORY

Possible Anisotropy in the Radioemission of Certain Quasars. (T) V. N. Kuril'chik - 21 [27]
A Possible Explanation of the Observed Peculiarities in the Distribution of Quasistellar Objects with Respect to Their Red Shifts. (T) E. A. Karitskaya and B. V. Komberg - 33 [43]
The Nature of the Outbursts in Quasars and Seyfert-Galaxy Nuclei. (T/E) I. S. Shklovskii - 594 [742]
A Method for Estimating the Mass of Quasistellar Objects and Galaxy Nuclei with Red-Shifted Absorption Lines. (T/E) E. M. Karitskaya and B. V. Komberg - 656 [817]

RADAR ASTRONOMY

Possible Role of the Maser Effect in the Radar Echo from the Sun. (T) I. M. Gordon and V. N. Tsytovich - 567 [708]

RADIATION SCATTERING

The Milne Problem for Anisotropic Scattering. (T) V. V. Sobolev - 202 [246]
Diffuse Reflection and Transmission of Light by a Planetary Atmosphere with a Three-Term Scattering Law. (T) A. K. Kolesov and O. I. Smoktiti - 319 [397]

The Inverse Compton Effect for Power-Law Radiation Scattered by Relativistic Electrons with a Power-Law Spectrum. (T) V. M. Charugin - 531 [664]
Emission of a Homogeneous Sphere in an Isotropic Radiation Field. (T) A. V. Kurchakov -

RADIO ASTRONOMY

Scintillation of Radio Sources of Finite Angular Size. (T/E) V. I. Shishov - 148 [182]
Scattering of the Decimeter Radio Emission of the Crab Nebula by the Solar Corona. (E/T) L. L. Bazelyan, S. Ya. Braude, and A. V. Men' - 153 [188]
The Possibility of Investigating Properties of Martian Soil through its Radio Emission. (T/E) V. S. Troitskiy - 308 [384]
Radiophysics: Abstracts of Papers on Astrophysics Published in the Journal Radiofizika (R) - 370 [458]
The Possibilities of Determining Variations in Longitude Differences from Radio Observations. (T) E. N. Fedoseev and N. S. Bilnov - 537 [671]
Radiophysics: Abstracts of Papers on Astrophysics Published in the Journal Radiofizika. (R) V. A. Efanov, A. G. Kislyakov, V. I. Kostenko, L. I. Matveenko, I. G. Moiseev, and A. I. Naumov - 744 [922]

RADIO EMISSION MECHANISMS

Pulsars and Nonthermal Radio Sources. (T) N. S. Kardashev - 375 [465]
Extragalactic Radio Sources. I. Radio Spectra: Statistics, Interpretation, Classification. (E/T) V. N. Kuril'chik - 630 [787]

RADIO LINE EMISSIONS

Physical Conditions in the Orion Nebula from Observations of the H560 Excited-Hydrogen Radio Line. (E/T) R. L. Sorochenko and I. I. Berulis - 633 [850]

RELATIVITY AND GRAVITATION

On a Study by Podurets of the Stability of Relativistic Star Clusters. (T) James R. Ipser - 364 [452]
Growth of Perturbations in an Expanding Universe of Free Particles. (T) G. S. Biaoovaty-Kogan and Ya. B. Zel'dovich - 758 [942]
Correlation of Fluctuations in Gravitating Media. (T) I. L. Genkin - 778 [967]

SELENODESY

Compilation of a Hypsometric Map of the Visible Lunar Hemisphere with Allowance for Relief. (E) Yu. N. Lipkii and V. A. Nikonov - 326 [407]
Principles of the Physical Mapping of the Lunar Surface. (E/T) Yu. N. Lipkii and V. V. Shevchenko - 469 [586]
Physical Mapping of the Moon from Photometric Data. (E/T) V. V. Shevchenko - 478 [599]
Systematic and Random Differences in Selenodetic Reference Nets. (E) V. S. Kislyuk - 487 [610]
I. V. Gavrilov. The Figure and Dimensions of the Moon from Astronomical Observations. (R) Reviewed by Ya. L. Ziman and I. V. Isavnina - 546 [680]
Comparative Analysis of Systematic Reference Systems on the Lunar Surface Based on 1:1,000,000 Scale Maps. (E) A. A. Gurshtein and A. A. Konopikhin - 871 [1087]
A Catalog of Reference Points in the Western Libration Zone and the Eastern Sector of the Moon's Far Side. (E) Yu. N. Lipkii and V. I. Chikmachev - 1023 [1282]

SHOCK WAVES

Emission from the Wake of a Shock Wave in Stellar Atmospheres. (T) V. I. Golin'ko - 117 [145]
Shock Waves in the Spiral Arms of Sc Galaxies. (T/E) S. B. Pikel'ner - 602 [752]

SOLAR ACTIVITY

Comparison of the Observed Monthly Wolf Numbers as Smoothed by the Moving-Average and Whittaker Operators. (T/E) L. V. Zhukov and Yu. S. Muzalevskii - 287 [357]
The Fluctuations in the Monthly Wolf Numbers. (E/T) Yu. S. Muzalevskii and L. V. Zhukov - 432 [541]
Quasixisymmetric Models for a Magnetic Dynamo and the Nature of the Solar Activity Cycles. II. A Dynamo with Radially Differential Rotation. (T) R. S. Iroshnikov - 1001 [1253]

SPECTRA, ATOMIC AND MOLECULAR

The Applicability of the Boltzmann Distribution for the Vibrational States of Molecules on the Sun. (T) A. P. Sarychev - 996 [1246]

SPECTRAL LINES

Electrodynamic Line Broadening and Stark Effect Together with the Linear Stark Effect. (T) Yu. I. Galushkin - 301 [375]
Computer Determination of the Wavelengths of Spectral Lines. (E) G. I. Abbasov - 539 [673]
Effect of Macro turbulence on Fraunhofer Line Profiles. (E/T) É. A. Ourtovenko and V. A. Ratnikova - 845 [1053]

STARS, ATMOSPHERES

Emission from the Wake of a Shock Wave in Stellar Atmospheres. (T) V. I. Golin'ko - 117 [145]

STARS, DISTANCES AND DISTRIBUTION

Kinematical Nonuniformities in the Distribution of Mira Stars. (E) T. G. Gotska - 978 [1235]
The z Distribution of Early-Type Stars. (E) G. G. Borzov - 988 [1237]

STARS, FORMATION

Cold Regions of Interstellar Gas and the Formation of Stellar Associations. (T) S. B. Pikel'ner - 208 [254]

STARS, GIANT AND SUPERGIANT

Chemical Composition of the Atmospheres of Type M Supergiants. (E/T) M. Ya. Orlov, M. H. Rodriguez, and A. V. Shavrina - 690 [859]

STARS, METAL-LINE AND MAGNETIC

A Photoelectric Study of the Magnetic Star β Coronae Borealis. (E) É. S. Brodskaya - 529 [662]

STARS, MOTIONS

Some Determinations at Pulkovo of Absolute Stellar Proper Motions Relative to Galaxies. (E/T) N. V. Fatchikhin - 495 [619]
The Z Motions of Groups of Early-Type Stars and Orion Variables. (E) N. M. Artyukhina - 533 [667]

STARS, PECULIAR

Inhomogeneities of Chemical Composition and Physical Conditions at the Surface of the Sill Ap Stars Cu Vir and 56 Ari. (T) V. L. Khokhlova - 107 [132]

STARS, SPECTROPHOTOMETRY

Spectral Energy Distribution of Eight Stars. (E) N. S. Komarov and V. A. Pozigan - 440 [551]
Normal Color Indices of Cepheids. III. (T/E) N. S. Nikolov and G. R. Ivanov - 806 [1004]
The Normal Color Indices and Color Excesses of Long-Period Cepheids. (T/E) E. N. Makarenko - 970 [1215]

STARS, STRUCTURE AND EVOLUTION

Nonequilibrium β Processes as a Source of Thermal Energy of White Dwarf Stars. (T) G. S. Biaoovaty-Kogan and Z. F. Sel'dov - 113 [139]

The Evolution of Massive Stars and Strömgren Zones. (T) G. S. Bleanovskiy-Kogan and R. A. Syunyaev - 351 [441]

STARS, SUPERDENSE AND NEUTRON

Ionization Zones around Neutron Stars: H α Emission, Heating of the Interstellar Medium, and the Influence on Accretion. (T/E) V. G. Shvartsmann - 662 [824]

Thermodynamics under Conditions of Hot Matter Neutronization and the Hydrodynamic Stability of Stars at Late Stages of Evolution. (T) V. S. Imshennik and V. M. Chechetkin - 747 [929]

X-Ray Sources in Binary Systems. (T) O. Kh. Guseinov - 912 [1143]

STARS, SUPERMASSIVE

Supermassive Stars Formed by Inelastic Evolution of Stellar Systems. (T) L. É. Gurevich - 25 [32]

SUN, ATMOSPHERE

The Formation Mechanism of Active Regions. (T/E) Yu. B. Ponomarenko - 78 [98]

Determination of Turbulent Velocities and Damping Constants in Faculae and in the Photosphere. (E) G. F. Sitnik and O. N. Mitropolskaya - 571 [713]

A10,830 Line in Solar Active Regions. (E) Nguyen Ngan - 577 [720]

Effect of Macroturbulence on Fraunhofer Line Profiles. (E/T) É. A. Gurtovenko and V. A. Ratnikova - 845 [1053]

SUN, COSMIC RAYS

The Magnetic Fields of Meteor Streams as a Possible Mechanism for the Diffusion of Cosmic Rays in Circumsolar Space. (E/T) S. A. Bel'skii - 163 [201]

SUN, FLARES AND PROMINENCES

Electron Concentration and Structure of Chromospheric Flares. (E/T) L. N. Kurochka - 89 [111]

Hydrogen Ionization and the Excitation of Quiescent Prominences. (E/T) A. I. Kiryukhina - 818 [1019]

SUN, MAGNETIC FIELDS

Quasixisymmetric Models of a Magnetic Dynamo and the Nature of Solar Activity Cycles. I. (T) R. S. Iroshnikov - 582 [726]

Relationship between Velocity Fields and Magnetic Fields in the Solar Atmosphere. (E) S. I. Gopasyuk and T. T. Tsap - 813 [1012]

Quasixisymmetric Models for a Magnetic Dynamo and the Nature of the Solar Activity Cycles. II. A Dynamo with Radially Differential Rotation. (T) R. S. Iroshnikov - 1001 [1253]

SUN, MOLECULES IN ATMOSPHERE

A Mechanism for the Formation of the CN Lines in the Solar Photosphere. (T/E) A. I. Khlystov - 83 [103]

Constancy of the Temperature in the CO Molecule Layer of the Solar Atmosphere. (E/T) G. F. Sitnik and V. V. Polonskii - 413 [516]

Physical Conditions in Faculae and the Photosphere at the Level of Formation of the CH Molecule. (E/T) A. I. Khlystov and G. F. Sitnik - 992 [1242]

The Applicability of the Boltzmann Distribution for the Vibrational States of Molecules on the Sun. (T) A. P. Sarychev - 996 [1246]

SUN, RADIO EMISSION

Contribution to the Theory of Type III Solar Radio Bursts. I. (T) V. V. Zheleznyakov and V. V. Zaitsev - 47 [60]

Determination of Two-Dimensional Structure of the Noise Storm of May 20, 1966 from Data of Eclipse Observations of Four Stations. (E) A. A. Gnedzlov - 59 [76]

The Hellographic Longitude Distribution of Type III Radio Bursts. (T/E) V. V. Fomichev and I. M. Chertok - 185 [226]

The Theory of Type III Solar Radio Bursts. II. (T/E) V. V. Zheleznyakov and V. V. Zaitsev - 250 [308]

The Polarization of Solar Radio Emission Observed after Reflection at Meter Wavelengths. (T/E) V. V. Fomichev and I. M. Chertok - 261 [322]

X and Radio Emission from Local Solar Sources. (E/T) G. B. Gel'freikh, I. A. Zhitnik, and M. A. Livshits - 266 [329]

Polarization of Local Sources of Solar Radio Emission at 4.4 cm. (E/T) G. B. Gel'freikh and N. G. Peterova - 553 [689]

Observations of Solar Radio Bursts with High Spectral Resolution. (E) A. K. Markeev and G. P. Chernov - 835 [1044]

SUN, X RAYS AND GAMMA RAYS

X and Radio Emission from Local Solar Sources. (E/T) G. B. Gel'freikh, I. A. Zhitnik, and M. A. Livshits - 266 [329]

Quiet Corona Temperature Determined from the Soft X-Ray Radiation Flux. (E/T) I. A. Zhitnik, V. V. Krukov, and M. A. Livshits - 563 [702]

Thermal Model of Solar Corona Active Regions. (E/T) I. L. Beigman and L. A. Vainshtein - 825 [1030]

SUNSPOTS

The Structure of the Magnetic Field in a Sunspot with a Photospheric Light-Bridge at Two Levels in the Solar Atmosphere. (E/T) Kh. I. Abdusamatov - 64 [82]

The Properties of Low-Frequency Oscillatory Convection in a Strong Magnetic Field. (T) Yu. D. Zhugzha - 274 [340]

Determination of the Azimuthal Electric Currents in the Surface Layers of Sunspots. (T/E) J. Jakimiec - 416 [520]

Observations of Sunspot Magnetic Fields: Two New Effects. (E) V. F. Chistyakov - 426 [533]

SUPERNOVAE

On the Theory of Supernova Explosion Light Curves. (T) L. É. Gurevich and A. A. Rumyantsev - 645 [804]

The Explosion of a Rotating Star as a Supernova Mechanism. (T) G. S. Bleanovskiy-Kogan - 652 [813]

Photometric Aspects of Type I Supernovae. (T/E) Yu. P. Pskovskii - 798 [994]

SUPERNOVA REMNANTS

The Half-Width of the H α Line and Radial Velocities in the Cygnus Loop. (E/T) V. T. Doroshenko - 237 [292]

Pulsars and Nonthermal Radio Sources. (T) N. S. Kardashev - 375 [465]

TIDES AND TIDAL PHENOMENA

A Correlation Analysis of the Earth Tides and Nutation. (E/T) G. P. Pili'nik - 1044 [1398]

TIME SYSTEMS

Some Results of Clock-Correction Determinations by the Method of Star Pairs Symmetric about the Zenith. (E/T) V. N. Pyshenko - 505 [633]

TURBULENCE

Spectrum of Relativistic Particles Accelerated by Plasma Turbulence. (T/E) V. N. Tsytochik and A. S. Chikhachev - 385 [479]

Determination of Turbulent Velocities and Damping Constants in Faculae and in the Photosphere. (E) G. F. Sitnik and O. N. Mitropolskaya - 571 [713]

Effect of Macroturbulence on Fraunhofer Line Profiles. (E/T) É. A. Gurtovenko and V. A. Ratnikova - 845 [1053]

VARIABLE STARS

Inhomogeneities of Chemical Composition and Physical Conditions at the Surface of the SHI Ap Stars CV Vir and 56 Ari. (T) V. L. Khokhlova - 107 [132]

Some Procedural Matters in Astronomical Photography. (T/E) A. B. Palei - 167 [206]

The Variable Spectrum of HD 217050. (E) Roshdi Azer Gobros - 356 [445]

A Photoelectric Study of the Magnetic Star β Coronae Borealis. (E) É. S. Brodskaya - 529 [662]

Kinematical Nonuniformities in the Distribution of Mira Stars.

(E) T. G. Gotska - 978 [1235]

VENUS

An Analysis of the Brightness-Temperature Spectrum and the Structure of the Lower Atmosphere of Venus. (T/E) O. N. Rzhiga - 453 [566]

WHITE DWARFS

Nonequilibrium β Processes as a Source of Thermal Energy of White Dwarf Stars. (T) G. S. Bisnovatyi-Kogan and Z. F. Sel-dov - 113 [139]

X RAYS, EMISSION MECHANISMS

The Inverse Compton Effect for Power-Law Radiation Scattered by Relativistic Electrons with a Power-Law Spectrum. (T) V. M. Charugin - 531 [664]

The Background Radiations. (T/E) O. F. Prilutskii, I. L. Rozen-tal', and I. B. Shukalov - 669 [832]

X-RAY SOURCES

X-Ray Sources in Binary Systems. (T) O. Kh. Guseinov - 912 [1143]

Soviet Journal of NUCLEAR PHYSICS

Publication of SOVIET JOURNAL of NUCLEAR PHYSICS, a cover-to-cover translation of the USSR Academy of Sciences' *Yadernaya Fizika*, began with the issue of July 1965 (*Yad. Fiz.* Vol. 1, No. 1, Jan. 1965).

Work in experimental and theoretical research on the physics of the nucleus, application of nuclear methods to other areas, cosmic rays, and elementary particle physics—previously contributed to JETP and other journals—now appears in this periodical.

SOVIET JOURNAL of NUCLEAR PHYSICS, published monthly by the American Institute of Physics, contains translations of some 2,300 Russian pages annually. Subscription price:

*U.S. & Poss.
Canada, Mexico*
\$85

*Europe, Middle East
No. Africa (air freight)*
\$90

*Elsewhere
(surface mail)*
\$89
